WHO WE ARE

LET'S KNOW ABOUT

Eureka! Archimedes shouted when he hit on a method to discern the purity of gold. We jubilantly exclaimed when our first design materialised and took shape into a sink that was more than just a sink, it was an innovation- of the standard no less than that of gold. That Eureka moment- the feeling, the inspiration, the excitement never sank! A decision was then taken to christen the venture as 'Eureka' to reminisce the breakthrough and firmly etch it into memory forever.

Urvashi Rautela

The sole purpose of any kitchen sink is not just its use or usefulness. It should also fit or match with the kitchen surroundings or other furniture used in the kitchen. For fulfillment of both these purposes, a kitchen sink needs to be good looking, beautiful and should be perfect for long-term sustainability.

Our expert makers always try to deliver any object that befits the needs of looking simple as well as eye catching, beautiful and stylist, and above all a perfect match for any kitchen design.

Austenitic Stainless Steel

All Eureka stainless steel sinks are manufactured using only austenitic grade. Austenitic stainless steel are chromium & nickle containing stainless steel with very low carbon content, austenitic stainless steel formed through the generous use of austenitizing elements such as nickel, manganese and nitrogen. They are non-magnetic but can become slightly magnetic when cold worked cold working also enhances their strength. Austenitic stainless steel have mechanical properties over a wide range of temperatures. In addition, these steel are easy to clean, which enhances their use in applications in hygienic and sterile environments

Finish Type

MIRROR FINISH

Eureka uses a highly-polished commercial finish characterised by abright, shiny and reflective surface for minor finish.

Index

Piece to Piece replacement of kitchen sink will be life time.
Warranty does not cover if breakage due to fitting mistake.
Warranty will be valid only for domestic use only.
Warranty will be valid only for manufacturing defect.
Warranty does not cover for chemical lab or any chemical unit.
Warranty does not cover if use of any acid or hazard chemicals.
Because of production limitation, product size may be varied.

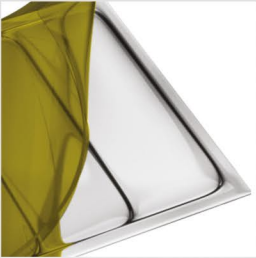

Installation

DIFFERENTIATED SOLUTIONS

Eureka offers built-in, under-top and top-flush solutions to satisfy all sinks integration requirements while enhancing visual appeal and practicality.

LxWxD : Length Width Depth

Scratch Guard

Every eureka sink comes protected with a thin plastic film over its surface. Scratch guard prevents scratches or marks on the sink during installation. Please remove the plastic scratch guard, after installation for ready to use.

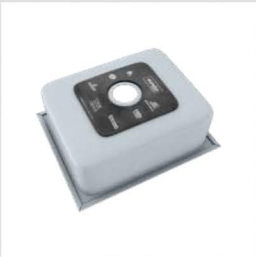

Super Drain

Super drain is provide to cleaned, clog free and waste free drain pipe for easy drain water. It's also prevent a cockroaches through the drain pipe in the kitchen.

Chokefree Strainer

Please not that for regular use the strainer has to be on as even level with the steel cup for the water to go down the drain.
If you want to store water in the sink, push the strainer down. Now you can use your sink as a water-tub, to wash utensils, vegetables, clothes etc.

Undercoat

Undercoat is extremely important for kitchen sinks, because it absorbs sound, protects against condensation and corrosion due to humidity in cabinet. All Royal series sinks are spray coated with exclusive undercoating.

Instructions to be followed carefully :

- 1) It is imperative to go through any product for warning or instructions before using it on stainless steel.
- 2) Before using a product directly on the entire utensil, try it on a spot or portion of the utensil that is not noticeable immediately.
- 3) Chlorine bleach containing products need to be only used in an utmost need, but the utensils must be washed clean and dry immediately after their use or stainless steel might get damaged.

Stainless Steel Cleaning Products :

Sponge or soft cloth use with soapy water rubber is generally used for cleaning of most stainless steel utensils. Wash clean and dry with a soft cloth immediately so that unnecessary marks or linings on the utensil may be prevented. Commercial stainless steel cleaning products may also be of good use as recent quality tests have proved these to be more advantageous in cleaning stainless steel utensils.
